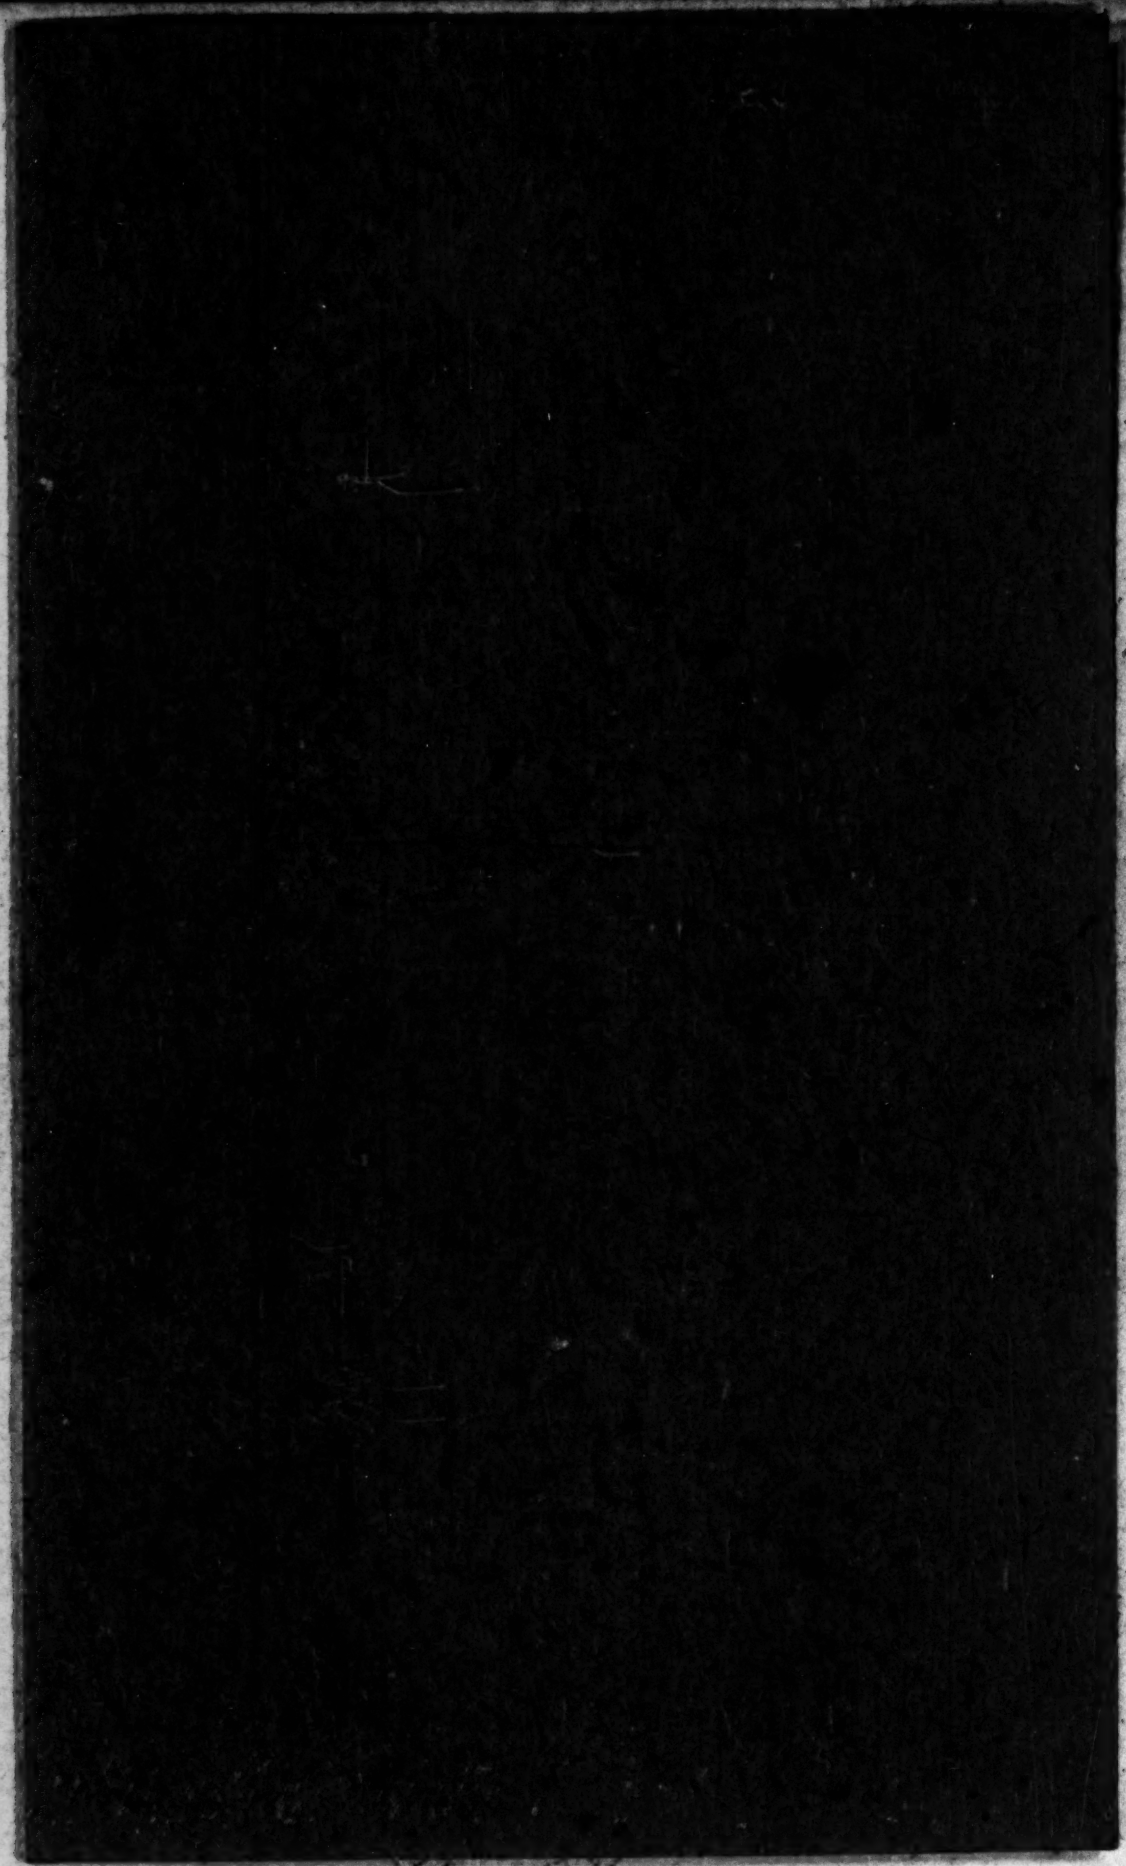
the Trumpet that one day shall blow a loude: Arise ye dead, and come vnto iudgement. To be short he neuer tasted of Christ, that is not crucified vnto the world, and the world vnto him, so farre that synne raygne not in hys mortall body. The Prince neuer tasted of Christ, ỹ putteth the glory of hys court in concupiscence, in pride, in blasphemie. The noble mã neuer tasted of Christ, that braggeth & boasteth of his parentage, and knoweth not ỹ he is but dust. The magistrate neuer tasted of Christ that sufferth this great carding & dising, that leaueth sinne vnpunished, & vertue vnrewarded. The Man or Woman neuer tasted of Christ, that cryeth not in spirite: O Lorde thou art myne inheritaunce. The Father of all mercy, and God of all consolation, strẽgthen vs with his grace, that we may tast of Christ. Amen.



A litle treatise, conteyning many *proper Tables and rules*, very necessary for the vse of all men.

¶ The contentes whereof appere in the next page folowing.

¶ Collected by Rychard Grafton.

1572.

¶THE CONTENTES OF this booke.

¶ Firste a Rule to know the begynning and ending of the Termes.

¶ A Calender with the length of dayes & nyghts for euery moneth in the yere.

¶ An Instruction, for the redy vnderstanding of the Computation.

¶ A Table or Rondell, wherein you may at all tymes readely fynde the yere of our Lord. The Epact, The Prime, The Dominical letter, & the Leape yere.

¶ A Rule at all tymes to knowe the age of the Moone, her full and chaunge for euer.

¶ An Instruction for the perfect vnderstanding of the maner & order of the Computacion, & other Tables hereafter folowing.

THE order of this small Booke, & the matters therin conteyned are as foloweth.

¶ Firste I haue placed herein a Rule to knowe the begynning & ending of the Termes.

¶ Then foloweth a Calender, wherein I haue obserued the olde Saynctes dayes, not of superstition, as though I thought euery of them mencioned in the saide Calender to bee a saincte (for of some I know the contrarye: Neyther if they were all Sainctes, do I therfore place thē in my Calender) But because it hath bene a custome of auncient tyme to vse their names, in signifiynge and making certayne the dayes, tymes, and Termes of the yere, as by the dating of diuerse olde Deedes, Euidences and Recordes it will apere. And because the same custome is yet retayned in the retornyng of writtes and processes, and also is commonly vsed in the noting and setting forth of the principal Faires and Markettes and other seasons of the yere, those names serue well for my purpose, and therfore I might not conueniently haue left them out. And vnto the sayd Calender I haue added the Calendes, Nonas, and Ides, because diuerse cuidēces are dated on those dayes, and by those woordes, and therunto also

I haue added the vigiles and Festiuall dayes, so that hauing thys Booke, there shalbee no occasion to call for any other Calender.

Next after the Calender, is a Table or Rondel that teacheth for euer readely to find the yeres of our Lorde, the Epact, the Prime, the Dominicall letter and the Leape yere, with a declaracion of the vse of the same Roundele.

And also a rule to know the age of the Moone her Chaunge, and Full for euer. Then followeth a Table to finde the feastes of Easter, and so all other the moueable feastes that haue ben in time past, or shall be hereafter for euer. wyth a plaine instruction of the vse and vnderstandynge thereof.

After that I haue set foorth an Almanacke for 30. yeres yet to come, wherein is shewed the first Sunday in Lent, Easter day, Rogacion weeke, and Whitsunday, and then you may finde al other moueable feastes.

Then a note to shewe what signe the Sunne is in euery moneth of the yere. Then a rule to know certainly the Dog daies. Then a litle note what a yere is. Then a rule to knowe all the vigils and fasting daies in the yere. Then a rule to knowe how many dayes be in the yere.

Then beginneth my Computacion of yeares, wherein is to be noted, that euerye page thereof is deuided into eight seueral parts or places, as may appere by the titles ouer euery of their heads. In the firste place are the yeres of our Lord, In the seconde the Pryme: In the thirde, the Epact: In the fowerth, the Dominicall letter: In the fifth, the Leape yere, when soeuer it happeneth: In the sixte, are the names of the kinges as they reygned, beginninge with William the Conquerour &c. And in the same place also are the Mones that euery of them entred into their reignes. And

in the

in the seuenth, are the daies of the Moneths that euery of them began to reigne in. And in the eight and last, are the yeres that euery of them reigned.

Also in the ende of the reigne of euery kynge I haue shewed the daye of his death if he died being kyng, or the day of his deposicion if he were deposed, with a true accompt how many yeres, Monethes, weekes or daies he reigned.

And heare I thinke it meete to declare somewhat of the commoditie and necessary vse of the Computacion afore mencioned. And for the better instruction and vnderstandinge thereof I will moue certeine questions, and geeue aunswers to the same, in suche sorte as shall so vtter the order and manner thereof (as it were by examples) that I doubt not, but the true & necessarye vse of the same, shall playnely appeare to al men.

1. *Question.*

I would knowe by thys Computacion in the fowerth yere of kinge Edwarde the first, what was then the yere of our Lorde, the Pryme, the Epact, Dominicall letter, and the Monethe and daye that he began his reigne in, and what day in the weeke the same was?

Aunswere.

Amonge the kinges, seeke out for kynge Edwarde the first, and then looke for the fowerthe yere of his reigne, and there it appeareth to bee the yere of our Lorde. 1275. The Pryme. 3. The Epact. 18. The Dominical letter. F. The Moneth that he began his reygne in, November, and the

16. daye, whiche day that yere was Saterdaye, as is easye to bee knowen if you looke in the Calender for the .xvi. day of Nouember, accompting F. for Sunday, then that day must nedes be Saterday, and so of al other the lyke.

2. Question.

An Euidence dated the 15. Calendes of December in the .iij. yere of king Jhon, I would know what day of the Monthe the same was, and how long it is sithen?

Aunswere.

First loke in the Calender in the Moneth of Nouember for the Calendes of December, and there you shal finde, that the .xv. Calendes of December is on the .xvij. day of Nouember. Then seeke in the Computacion for king Jhon, and you shal finde that the thirde yere of his reigne was in the yere of our Lorde .1201. And then set downe this yere of our Lorde wherein the question is asked, which is .1571 and take out therof .1201. and ther resteth .370. And so it must follow that vpon the .xvij. day of Nouember next, it shalbe sithen the .iij. yere of kinge Jhon. 370. yeres, and thus of the lyke.

3. Question.

An Euidence dated the second Sunday in Lēt in the fowerth yere of king Stephen. I would know in what yere of our Lorde the same was, and also in what Monthe, and on what daye the second Sunday in Lent was then?

First

Aunswere.

Fyrst looke among the kinges for kynge Stephyn. And when you haue found him then looke for the fowerth yere of his reigne, and there you shall finde the yere of our Lorde to be 1138. and the Pryme 18. and B. the Sundaies letter. Then go to the table that teacheth to knowe Easter day and al the moueable feastes, which is the next table sauing one before the Computacion.

And there vnder the title of Pryme, seeke among those nombers for. 18. And when you haue found it, looke downwarde from the lyne where the Pryme standeth, and seeke for the next B. which that yere was the Sundais letter. And when you haue found B. go forward in that lyne, and there you shall finde the xx. daye of February to be that yere the first Sunday in Lent, and therunto put seuen daies for one weeke more, and that sheweth that the second Sunday in Lent that yeare was the 27. daye of February. Then set downe thys present yere of our Lorde. 1571. and take out ther of the yere of our Lorde that was then whyche was. 1138. and there resteth. 433. And so it doth plainely appere that the. 27. day of February next comming, it shalbe 433. yeres sithen the fowerth yere of the reigne of king Stephen. And thus you may do with the like.

4. *Question.*

I haue a lease for. lxxx. yeres, that beganne at Mighelmas in the xvij. yere of king Henry the. 7. My desire is to knowe this present yeare. 1571. whether my lease be expired, or how many yeres I haue to come?

Aunswere.

First in the Computacion loke among the kinges for king Henry the.viij.& then for ỹ xviij.yere of his reigne, which you shal find to be in the yere of our Lord.1501. The which number take out of this present yere of oure Lord.1571. and then resteth 70.& so many yeres of the said lease shalbe expired at Myghelmas next,& then shall remaine 10.yeres to come.& so of the like.

5 ¶ *An other Question and playne example meete for suche as can not extracte one number out of an other.*

A lease dated the.vi of Julij, in the.31.yeare of the reigne of king Henry the eight, for the terme of 21.yeres that began at our Lady daye in Lent then next folowing: I would now knowe whether the saide lease be expired, or how many yeres there are to come?

Aunswere.

First loke in the Computacion among the kinges for king Henry the eight,& for the.31.yere of his reigne, whiche you shall finde to be in the yere of our Lorde 1539. Then at the next yere folowing begin to recon, and call that one, and so tell downe in order all the yeres folowing, and ende with this present yere.1571. And in the whole, you shall finde the number of.32. And so manye yeres of the saide lease shalbe expired at our Lady day in Lent next commynge. And at that tyme there shall remaine to come of the sayde lease viij. yeres & thus you may accõpt ỹ yeres of any lease.

Another very plaine question or example, easye for all men to conceyue, and in this time is commonly vsed.

A lease dated ỹ. 17. day of August, in the. v. yere of the reign of king Edward the vi. for ỹ terme of xxi yeres, which began at Mighelmas then next folowing. I aske the question this xij. day of August. 1571. whether the saide lease bee expired, or how many yeres are yet to come?

Aunswere.

First in the Computacion among the kynges, seke for king Edward the vi. & for the v. yeare of his reigne, & there you shal finde the yere of oure Lorde to be. 1550. Then begyn at the next yeare after, whiche is. 1551. and call that one, and so tell downward al the yeres, to this present yere. 1571 And in the whole you shall find. 21. which plainlye declareth that at Mighelmas next, the aforesayd terme of. 21. yeres shall be fully expired. And this you may do in ỹ accõpt of al termes of yeres.

Note also that in the saide Computacion diuers of the kings haue in the first yere of theire reigne no yere of our Lorde: The cause is, that they began in the same yere that the former king died in. And therefore when you tel the yeres, do not reken them that haue no yere of our Lorde.

Note also that the yere of our lord after ỹ Computacion of the Church of Englande, begynneth euer the. 25. day of March which is the day of the Annunciacion of our Ladye. And tht number of the Epact beginneth euer the first day of March, & the Prime the first day of January.

Note also, that when thou accomptest anye terme of yeres, that the same terme that thy lease first began in, must end & finish in the last yere of

thy reconynge at the selfe same Terme. As if thy lease began at Myghelmas for xxj. yeres, then it must ende at Myghelmas the same yeare that the whole xxj yeres are expired in, & if at Mydsomer, then it must ende at Mydsomer the same yere, as the last questiō and example doth plainely shewe.

And thys I trust may suffice for ỹ instructiō of the vse, order, & cōmoditie of the said Cōputaciō.

Then foloweth .iiij. Tables, that teache for euer to know in most Portes and Hauens of thys realme: when it is full Sea, with a plaine declaracion of the sayd Tables.

And fynally one other Table, shewing for euer what signe the Moone is & shalbe in euery daye, and declareth also what dayes are good to let Blood, Pourge, or Bathe &c.

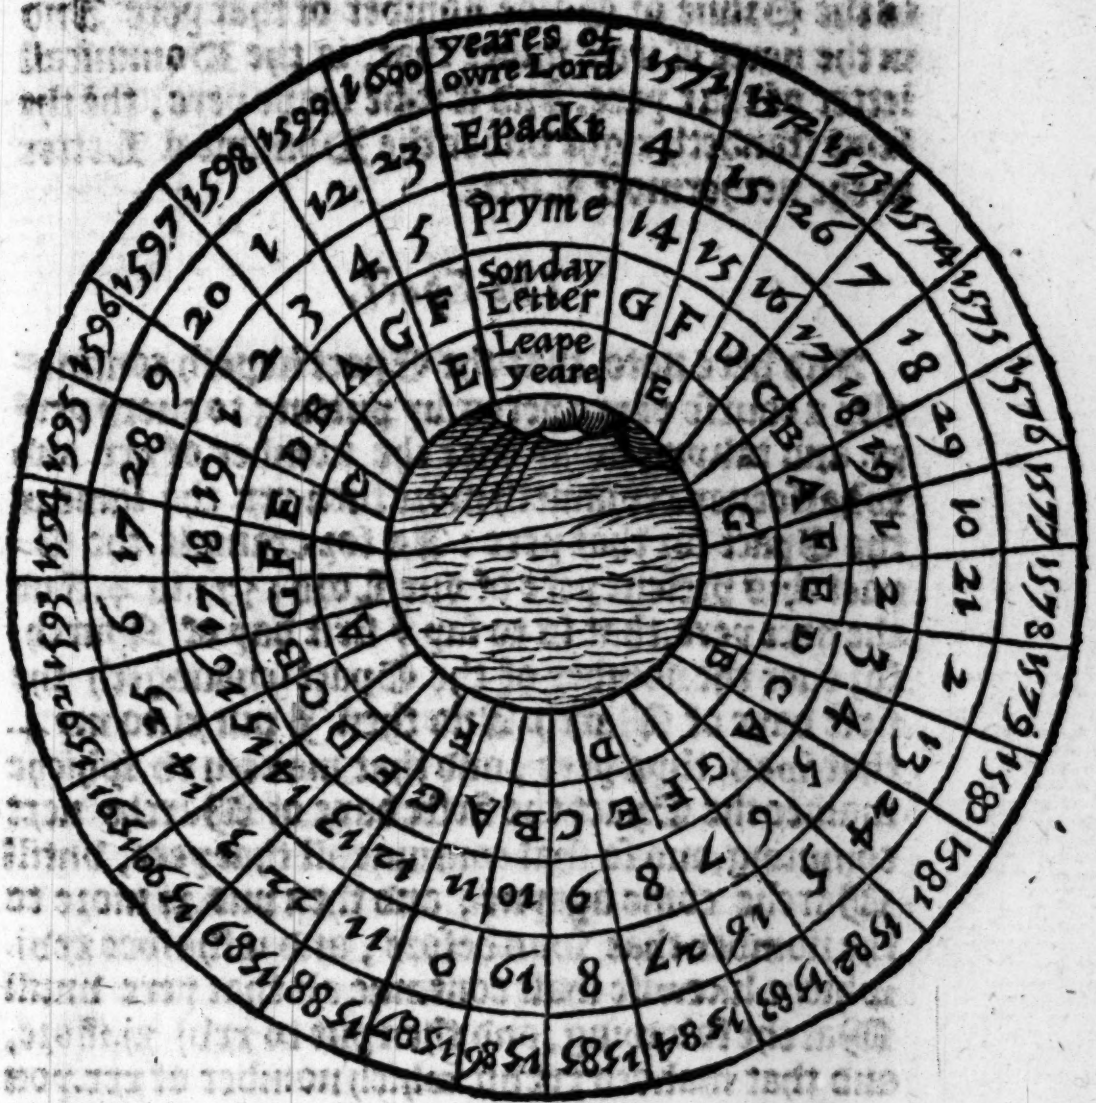
And hereunto haue I added the names of all the Colleges in both the Vniuersities, Oxford & Cambridge, and of their founders. Also the shires Cityes & Boroughes in thys Realme of England that haue in the Parliament house knights, Citizens and Burgesses. Then the names of the wards within the City of London. Then the names of the Parish Churches within the City of London, & liberties of the same. Then foloweth ỹ Month, daye, and place, of all the Faires kept in Englande, set forth in a more orderly maner then heretofore hath ben.

And finally, in ỹ later ende hereof is set out the waies (in a larger māner thē before they haue bē) as well how a man may trauel from any notable town in Englād, to the Citie of Londō, as from Lōdon to any notable Town, or frō one notable Town to an other in ỹ most partes of this realm: So ỹ herein are cōteined the chiefe & most necessary things ỹ pertaine to any mans trauel.

FINIS.

A Table

¶ *A Table, wherin thou mayst readely fynde* the Epact, the Prime, or Golden nombre, the Dominicall Letter, and the Leape yere for euer.



¶ *A declaracion of thys Rundell, and Circles in the same.*

FIrst note that in the forsaid Rundell are fiue Circles, & in the vppermost Circle are placed the yeres of our Lord, the which you must firste

looke

looke for, before you seeke for any of the other matters. After you haue founde the yere of oure Lorde, then in the next Circle vnder that, is the Epact of that yere, & the Circle next vnder that, is the Prime or Golde nomber of that yere. And in the nexte Circle vnder that, is the Dominicall letter of that yere. And if it be leape yere, the the same standeth right vnder the Dominical Letter in the nethermoste Circle.

The Epact.

And here note, that the Epact kepeth continually a course of xxx. yeres, by putting to euery yere xj. and takyng away euer the nomber of xxx. and whatsoeuer remaineth more then xxx. the same is the Epact for that yere: As for example, the Epact this present yere of our Lord 1571. is 4. And the next yere, that is to say the first day of March, for euer the nomber of the Epact chaungeth the first daye of March. And then I put xj. to my 4. that was thys yere, and that maketh xv. whiche shalbee the Epact the firste daye of Marche next comming, and so shal continue all that yere, vntill Marche come agayne, and then put xj more to the nomber that was before, and it shalbee xxvj. whiche likewise shall continue all that yere vntill Marche folowing, and then put to xxvj. xj. more, and that maketh xxxvij. which nomber of xxx. you must put away, and then resteth vij. for the Epact of that yere. And whensoeuer the nomber of the Epact is full xxx. the is there no Epact that yere.

Also note, as I sayde before, that the course of the Epact continueth 30. yere, and the very same nomber that is the Epact thys yere, shalbee the Epact again xxx. yeres hence, as thou maist easely perceiue by the aforesaide Circle, whiche setteth

out

out the whole course of the Epact for 30. yere, & then beginneth again as it began before, and so it is a perfect nomber for euer.

¶ *The Prime or Golden Nomber.*

The Prime is a nomber that begynneth with one, and yerely increaceth one, vntil it come to the nomber of xix. and then it beginneth again. one &c. So that euery xix. yere is the whole course of the Prime or Golden nomber for euer.

¶ *The Dominicall Letter.*

¶ The Dominical or Sondayes Letter kepeth hys course 28. yere, And the same Letter that is Sondaies letter thys yere, shalbee the Sondaies Letter 28. yere hence. And so haue you the Rule to find the Sondaies Letter for euer.

¶ *The Leape yere.*

¶ The Leape yere as you may perceaue by the former and nethermost Circle, chaunceth euerye iiij. yere. And euer when thou mayest deuide the yere of oure Lorde euen in iiij. partes, then is it Leape yere. And thus you haue a full and perfect declaracion of the former Rundell, and the Circles therein conteyned.

¶ A Rule to knowe at all tymes *the Age of the Moone, her chaunge and full.*

IF you desire at any tyme to knowe how olde ẏ Moone is. First cõsider what day of ẏ Mõth it is that you wold knowe the age of the Moone.

And

And then know what nomber the Epact is that yere, and put them together, then accompt how many Monthes the same is from the Month of Marche, and recon Marche for one, and thē put all together, and se what nomber that maketh. If the nomber bee more then 30. take out the 30. and looke what resteth, and so many dayes olde the Moone is: But if it bee iust 30. then you may bee sure that the same day ỹ Moone chaūged, or was the first day of the Moone: And if the nomber be lesse then 30. what soeuer it bee, so many dayes olde is the Moone. And for the better vnderstan dinge hereof, I will geeue you an example or twayne.

Example.

I wold know the xv. day of December next cō=ming 1571. how olde the Moone wilbee. First I haue in memory this nomber xv. and streyght I put thereunto the nomber of the Epact thys yere whiche is 4. and that maketh 19. then I put so many Monthes thereunto as is from Marche to December, and recon March for the first, and December for the laste, and they are x. the whiche I put to my aforesayde nomber 19. whiche in the whole maketh 29. and so many dayes olde shall the Moone be the 15. day of December next.

An other Example. I wold know the 19. daye of September next comming 1571. how olde the Moone shalbe: First I put in memory 19. which is the day I aske the question of, and I put ther=vnto the Epact of thys yere, which is 4. and that maketh 23. and thereunto I put so many Mon=thes as is from March to September, and rekē March for one, as I dyd in the last example, and that is 7. Monthes, which nombers being put all together make 30. & that day the Moone changeth

or is

or is the first day of the Moone. And thus of all other.

The yere when there is no Epact, whiche as you maye percepue by the former Table chaunceth euerye xix. yere, then alwayes that yere the Moone changeth the first day of March. And all that yere you shall reke for the age of the Moone the day of the Month, and so many Monthes as is from March, and that is the age of the Moone for that yere.

Now when you know the chaūge of the Moone, put thereunto 7. and there beginneth the fyrst quarter, and the 15. day is full Moone, and 7. dais more beginneth ỹ last quarter. And thus ye may readely and quickely reken vppon your fingers, & finde the new Moone, full Moone, and the age of the Mone at any time for euer.

And when you haue the former rule in perfecte memorye, then maye you at any tyme tell when it is full Sea, or lowe water, namely here in the ryuer of Thames at London Bridge, as thus. Knowe for a certaintie that euery change of the Moone, & euery full Moone maketh a hygh water or full Sea at London Bridge at iij. of the clocke eyther in the morning or at after noone, & then may you reken so many days from the change to the full Moone which is 15. days, and accompt the tide to encrease euery daye one houre, which is xv. houres, and then abate xv. quarters, for in a daye are two tydes, a flood and an Ebbe, and they both alter scant iij. quarters of an houre, except stormes and Tempestes cause the contrary, and so you may from day to day where so euer you are, know the certeintie of the tyde at Londō Bridge. And the better to leade you vnto the vnderstanding hereof, take thys example.

I would know the xij. of Septēber next 1571.

at

at what tyme it shalbee hyghe water at London Bridge. Firste I reserte to my former Rule, and serche how many dayes olde the Moone will bee that day, and I fynde that the Moone shalbee 23. dayes olde, and then I consider that the 15. daye, whiche daye the Moone was at the full, it was hyghe water at three of the clock, then for eyghte dayes more, I adde for euery daye three quarters of an houre, and that is vj. houres, whiche I put to three of the clocke, and that maketh nyne of the clock, at whiche houre shalbee a hyghe water, and then tell from nyne of the clocke, seuen houeres more, and that maketh iiij. of the clock, & then shall it bee a dead lowe water, and thus of all other for euer.

(::)

¶Here foloweth a Table, which *sheweth how you may readely find Easter, and all other moueable Feastes of the yere for euer, as well for tymes past, as for the tymes to come.*

¶ A descripcion of the order and vse of the aforesaide table as foloweth.

FIrst note, that the sayd Table is deuided into sixe partes or places. In the first is the Prime, in the second, the Dominicall Letter, in the thirde, the firste Sondaye in Lent, in the fourth Easter daye, in the fifth, Rogacion weeke, and in the sixte Whitsondaye.

And for the better vnderstandinge of the vse therof, ye must always when you desyre to know the tyme of any of the said feastes, firste consider what yere of the Lord it is that you would know them in, and then looke what was or is the Prime of that yere, and the Dominicall Letter, and those may you easely fynde and learne in the little Roundeale, that is before set forth. And whē you know the Prime, and Sondayes letter, then come to thys Table, and it will easely shewe you your desire.

¶ *Example.*

¶ I woulde knowe in the yere of our Lorde 1574. when shalbee the firste Sonday in Lent, Easter daye, &c.

First I go to the Roundele aforesaide, & there in the vppermost Circle, I seke out the yere of our Lord 1574. and in the second Circle directly vnder that, there I fynde that yere the Prime to bee 17. and vnder that, the Dominicall Letter to bee C. Then I come to the abouesaide Table, and first vnder the tytle of Prime I seeke for the nombre of 17. and whē I haue found the same, thē I loke downward among the Sondayes letters for the next C. that is after the Prime, for that is

the

the Sundaies letter for that yere, and when I haue founde C. I go forward in that line where C. standeth. And first I finde that the 18. daye of Februarij that yere, shalbe the first Sundaye in Lēt: The. 11. day of Aprill, Easter daye: The 16. day of Maye, Rogacion weeke, and the 30. daye of May whitsonday. And thus may you do with al other, both for time past, and tyme to come, for euer.

Note also that this Table in the begynnynge sheweth the lowest Monethe and day in the yere, that Easter, and al other moueable feastes do fal in. And in the end, it sheweth the highest Moneth and daye that Easter, and the moueable feastes do ascend vnto: so may it be truely said, that it is a perfect table.

And yet hereunto will I adde one rule, which though it be in olde and rude meter, yet is it worthy of memory, and it is the same rule, whereby this Table was made, which is this.

In Marche after the fyrst C
looke the Prime where euer it be.
The thirde Sonday after, Easter day shalbe.
And if the Prime on the Sonday bee,
Then recken that for one of the three.

An Almanacke for xxx. yeres yet to come.

The yere of our lorde.	The Prime.	The Epact.	Domi. letter	Leap yere.	Aſhwéſe-laye the firſt daye of Lent.	Eaſter daye.	Roga. weke.	Whitſonday.

¶ A declaration of the Tables, last *before menciaved.*

If you be desirous at any time to knowe when it is a full Sea or highe water at any Port or Hauen in Englande Wales, or Ireland, or in any other parte of the worlde. If first by your owne knowledge or the knowledge of any expert mariner, you knowe whē you see the Moone in such a parte of the firmament, that then it is full sea at suche a port or hauen, then these Tables shalbe needeles for you, but if you can not so doe, and woulde learne, then resort to these Tables, & first consider with your selfe howe many dayes old the Moone is ỳ day ỳ you desire to knowe ỳ tide. And in the myddle of the same tables, you shal fynd in the vppermost part of them, this title. The age of the Moone. And right against the day of the age of the Moone, you shall finde on bothe sides, the plates & points of the firmament, as South, South and by West, and South South West &c. And next vnder that line, are these letters H. M. whiche signifie Howers and Mynutes. Then hauing in memory the age of the Moone, as afore saide, go directlye to the title of that place of the firmament, to the whiche when the Moone commeth maketh a highe water, and there you shall finde the Howr & Mynute when it is full Sea in that place.

¶ Example.

¶ I woulde knowe at what howr it wil be a full Sea or hyghe water at London Bridge the xx. day of December next, being in the yere of our Lorde. 1571.

¶ *Aunswere.*

¶ First reſorte you to the former Table that teacheth you to knowe the age of the Moone at all times, and by that rule you ſhall find, that the xx. daye of December nexte, the Moone ſhall bee fower dates olde. Then looke vppon the titles in the vppermoſte parte of the aforeſaide Tables, and amonge them you ſhall finde London. And directly in the lyne next vnder the ſame, you ſhall finde Southweſt, the which declareth that when the Moone is in the Southweſt, that then it is ful ſea at London Bridge. Then go downe the line of the age of the Moone, vntill you come at the fowerth daye, and there you ſhall finde on the left hande of the ſame, directly vnder the line where Southweſt ſtandeth theſe figures. 6.12. whiche is. vi. of the clocke and xij. Mynutes, at whiche time the aforeſaide, 20. daye of December next ſhal be highe water at London Bridge. And in the vppermoſt parte of the aforeſaide Tables, I haue written the names of ſome Portes, at whiche time the Moone comming to that place cauſeth a full Sea, and vnto them ye maye adde ſuch other as you haue or ſhal haue knowledge of.

(.)

A Table shewinge what Signe the Moone is in, and shall be for euer, and shewynge also the times good to let Blood, to Purge, and to Bathe.

¶ A Declaracion of the Table.

that is on the other side, shewing at all tymes what signe the Moone is in.

FIrste, for the better vnderstanding thereof: Note that it is deuided into seuen titles, that is to saye, into Monethes, Daies, Prime, Signes: to let blood: purge and to bathe: Now if you will knowe at any tyme what signe the Moone is in, you must firste seke out in the sayde Table among the monthes, for the moneth wherin you desier to bee certified, and likewise, among ye title of dayes, for the daye of the moneth that you desire: And when you haue found them, then begin at the moneth, and tell the same for one daye, and so go forth vntill you come to the nomber of the dayes that you wouide haue, and note well what daye the same doth ende vppon, and keepe it in your memory. Then seeke for the Prime of that yere among the title of Primes, and accompting the Prime for one, tell so many dayes as before you committed to memory, and then on the right hand you shal find what signe the Moone is in, and what dayes are good to let blood, to purge, & to bathe, which are noted with these two letters, G. for good, and B. for bad, and where there is no Letter, there the signe is indifferent.

¶ *Example.*

¶ I would know the twelue daye of Nouember nexte, in thys present yere of our Lord 1571. what signe the Moone wil bee in. First I looke in the aforesaid Table, among the tytle of the monethes, and there I fynde Nouember together

with

with Februarij placed against ꝯ figure 1. whiche is in the tytle of dayes, and there I begyn to reckon, and call the figure of 1. one, and so tell downwarde vntill I come to 12. and I finde that the same endeth vppon 12. whiche nombre I kepe in memory. Then I seeke for the Prime of thys yere, which is 4. among the title of Primes, and on the left syde therof standeth 11. and there I begyn againe, and call that 11. one, & so go downwarde, till I come to the nomber which I had kepte in memory, which was 12. and on the right side therof I finde ꝯ signe to bee *Capricornus*, naught to let Blood, to Pourge, or to Bathe. And thus of all other.

¶ The names of all the Colleges *in both Vniuersities, Oxford & Cambridge & of theyr Founders.*

1 ¶ Vniuersitie College, Founded by Allured, Kynge of the Saxons, in the yere of oure Lord. 872. — Vniuersitie College.

2 ¶ Baylye College, Founded by Jhon Baillioll Kyng of Scottes, in the yere of our Lord. 1263. — Balioll College.

3 ¶ Marcin College, Founded by walter Martyn Bysshop of Rochester, in the yere of our Lord. 1276. — Martyn College

4 ¶ Excester College, & Hartes Hall, Founded by Walter Stapletō Bishop of Excester. 1316. And the sayde College was muche encreased by Sir William Peter, late Secretarye to kyng Henry the eyght. 1566. — Excester Coll. Hartes Hall.

5 ¶ Oryall College, Founded by Adam Brownе brought vp in the Vniuersitie of Oxforde, — Oriall College.

by kyng Edwarde the second, in the yere of our Lord. 1323.

Queenes Coll. 6 ¶ Queenes College, Founded by Robert Egglesfielde Chaplein to Philipp, kyng Edwarde the thirdes wife. 1340.

New College. 7 ¶ New College, Founded by Willyam wicke Bysshop of Winchester, in the yere of oure Lord. 1375.

Lincoln Coll. 8 ¶ Lincoln College, Founded by Rychard Fleming Bishop of Lincolne, and encreased by Thomas Rotheram bysshop of ye same Sea in the yere of our Lord. 1420.

All Soules College. 9 ¶ Allsouls College, Founded by Henry Chicheley Archebishop of Cauntorbury, in the yere of our Lord 1437.

Magdalene College. 10 ¶ Magdalene College, Founded by Willyam Waynflete bysshop of Winchester, & Chauncellour of England. 1456. And he Founded also Magdalene Hall.

Magdalene Hall.

Brasen Nose. 11 ¶ Brasen Nose, Founded by Willyam Smith Bysshop of Lyncolne, in the yere of oure Lorde 1513.

Corpus Christi College. 12 ¶ Corpus Christi College, Fonded by Rychard Foxe Bishop of Winchester, in the yere of oure Lorde. 1516.

Christs Church. 13 ¶ Christes Churche, Founded in the yere of our Lorde 1529. by Thomas Wolsey Archebishop of yorke and Cardinall. And afterward landes were geuen for the maintenaunce of the same by kynge Henrye the eighte.

S. Iohns Coll. 14 ¶ Saint Ihons College, Founded by Sir Thomas White, late Maior and Alderman of London, in the yere of our Lord 1557.

Trinitie Coll. 15 ¶ Trinitie College, Founded by Sir Thomas Pope knyghte, in the yere of oure Lorde. 1566.

¶ Halles.

Cambridge.

¶Halles of Oxforde.

¶Gloceſter Hall.
¶Broade Gate
¶Saynt Mary Hall.
¶Albane Hall.
¶White Hall.
¶New Inne.
¶Edmond Hall.

¶Cambridge.

Sigebert.

¶ Sigebert kyng of the Eaſt Angles, in the yere of our Lord 637. Founder of the firſt cõmon Schoole in Cambridge.

Peter houſe.

¶Peter houſe, Founded in the yere of our Lorde 1274. by Hugh Balſome Byſhop of Ely.

Michaell houſe.

¶Michael houſe, Founded by Sir Henry Stanton knight, one of the Judges of the common Benche, the yere of our Lord. 1324.

Trinite Hall.

¶Trinitie Hall, Founded by Willyam Batmã in the yere of our Lord 1351.

Corpus Chriſti College.

¶ Corpus Chriſti College, Founded by Jhon of Gaunt Duke of Lancaſter. 1357. And about the ſame tyme Gonnell Hall was buylded.

Gonnell Hall.

Clare Hall.

¶Clare Hall, was firſt called Scholer Hall, and afterward the Vniuerſitie Hall, and was by miſchaunce conſumed with fyer, and then reedified by Elizabeth daughter of Gilbert Clare Earle of Leycester, in the yere of our Lorde. 1360.

Pẽbroke Hall.

¶Pembroke Hall, Founded in the yere of oure Lord 1374. by Mary Counteſſe of Pẽbroke.

Kynges Hall.

¶Kynges Hall, repaired in the yere of oure Lorde 1376. by kyng Edward the third.

Kynges Coll.

¶ Kynges College, Founded in the yere of oure Lord 1423. by kyng Henry the vj.

Queenes Coll.

¶ Queenes College, Founded by Margaret, the wife of king Henry the vj. and finiſhed by Elizabeth, the wife of king Edward the iij. in the yere of our Lord 1464.

Katherin Hall. ¶Katheryn Hall, Foūded in the yere of our Lord 1473. by Doctor Woodlake Prouost of ỹ kings College in Cambridge.

Iesus College. ¶Iesus College, Founded by Jhon Alcock Bysshop of Ely. 1504.

Christes Coll. ¶Christes College, Founded by Queene Margaret, Grandmother to kynge Henry the eighte.

S. Iohns College And likewise she founded Saint Jhons College in the yere of our Lord. 1509.

Magdalene College. ¶Magdalene College, Founded by the Lord Audeley in the yere of our Lord. 1509.

Trinitie. Coll. ¶Trinitie College, Founded by kyng Henry the eight, for the enlarging whereof, hee tooke into the same Myghell house and kinges Hall, and made of them one College in the yere of oure Lord. 1545.

Gonnell and Caius College. ¶Gonnel & Caius College, Founded first by one named Gonnel, and now muche encreased: by Jhon Caius Doctour in Phisicke, and therfore called Gonnell and Caius College, the which worke of the sayd Cayus was founded in the yere of the Lorde 1557.
